Jan Glasmeier founded Simple Architecture in 2016. With its highly collaborative and consultative design process, Simple Architecture is centered on social- and community-based architecture, designing and constructing buildings that meet the needs of local communities using sustainable, low-cost methods.

Christophe Aubertin from Studiolada and Fabian Hörmann from YR22, will be participating to enrich the discussion.

This event is co-organized with The Real Deal – Post-Fossil Construction for Game Changers.
